Electrical sockets,
all the standards available.

lineis, an innovative project, created by the union of only two high-strength aluminum profiles, an illuminated surface entirely integrated into the profile, which creates clean lines and harmonious shapes, allowing a more effective sanitation of the medical device.

Infrared remote control (not incl.)

The bed head unit can then be integrated with a 30x10 or 25x10 accessory bar, with electrical sockets on the lower part and switches on request. The design was also in agreement with the maintenance departments of the hospitals, to make it easy to inspect even after installation.

INOX steel medical rail:
30 x 10 // 25 x 10
